PLEASE do not prevent XM Radio and other satellite radios from providing local weather and traffic. It's instant, accurate and the rest of the channels are incredible!! It's the best and well worth my hard-earned \$9.99/month. And since this is a service that I pay for I do not see how it makes any sense that the NAB can tell me and the other million+ listeners what we can and can't hear. These are all high-quality stations with high-quality content and if the NAB is scared of that kind of stiff competition, quite frankly they should be! Maybe they should work a little harder at providing listeners with the kind of high-quality programming we satellite customers have come to know and love. Please support our right to continue to hear XM Radio and ALL of it's great channels and reject the NAB's petition 04-160.
